ADMINISTRATION MODULES
DATE: 04-JUL-2026

04-07-2026

PREFACE

Efficient administration and resource management are essential for maintaining smooth business operations, ensuring compliance, and maximizing organizational productivity. This document provides a comprehensive overview of the ERP Administration Modules designed to centralize and automate the management of facilities, assets, vehicles, lockers, and organizational documents within a unified platform.

The modules described in this document enable organizations to streamline facility operations, optimize asset utilization, improve fleet management, strengthen document control, and enhance operational visibility through real-time tracking and reporting. By integrating administrative processes into a single system, organizations can reduce manual effort, improve accountability, ensure regulatory compliance, and support informed decision-making.

This document serves as a reference guide for management, administrators, facility teams, asset custodians, fleet managers, and implementation stakeholders involved in configuring, operating, and maintaining the ERP system. The workflows, procedures, and best practices outlined herein are intended to support efficient administration, effective resource utilization, and sustainable organizational growth.

1. ADMINISTRATION MODULES

1.1. Facility & Office Management

The Facility & Office Management System is a comprehensive solution designed to manage and optimize all workplace facilities, office infrastructure, administrative services, maintenance activities, utility consumption, and employee support services across multiple branches and locations.

The system provides centralized control over office operations, ensuring efficient utilization of facilities, timely maintenance, improved workplace safety, cost control, and enhanced employee productivity. It enables management to monitor and manage all facility-related resources through a single integrated platform.

1.2. Facility Master Management

The system maintains a centralized repository of all company facilities and office locations.

Facility Information

- Facility Code
- Facility Name
- Branch Location
- Building Details
- Floor Details
- Office Areas
- Warehouse Areas
- Meeting Rooms
- Common Areas
- Parking Facilities
- Facility Status

Facility Categories

- Corporate Offices
- Branch Offices
- Warehouses
- Workshops
- Retail Outlets
- Staff Accommodation
- Storage Facilities

1.3. Facility Maintenance Management

The system supports preventive and corrective maintenance of office infrastructure and facilities.

Preventive Maintenance

- Scheduled Maintenance Planning
- Maintenance Calendars
- Inspection Schedules
- Service Reminders
- AMC Monitoring
- Vendor Coordination

Corrective Maintenance

- Maintenance Requests
- Breakdown Reporting
- Work Order Generation
- Technician Assignment
- Repair Tracking
- Completion Verification

1.4. Facility Complaint & Service Request Management

Employees can submit facility-related requests and complaints through a centralized portal.

Request Categories

- Electrical Issues
- Air Conditioning Problems
- Plumbing Complaints
- Furniture Repairs
- Cleaning Requests
- IT Infrastructure Issues
- Safety Concerns
- General Maintenance Requests

Workflow

Request Submission -> Approval -> Assignment -> Resolution -> Verification -> Closure

Management can monitor response times and service quality.

1.5. Utility Management

Tracks and monitors utility consumption and costs across all facilities.

Utility Categories

- Electricity
- Water
- Internet
- Telephone
- Gas
- Waste Management
- Generator Fuel

Monitoring Features

- Monthly Consumption Tracking
- Cost Analysis
- Usage Trends
- Budget Monitoring
- Variance Analysis

This helps management identify opportunities for cost optimization and sustainability improvements.

1.6. Visitor Management System

The system manages visitor registration, access control, and security monitoring.

Visitor Registration

- Visitor Information
- Purpose of Visit
- Host Employee
- Check-In / Check-Out
- Visitor Badge Generation
- Visitor History

1.7. Lease & Property Management

For rented facilities and office spaces, the system manages:

Lease Information

- Property Details
- Lease Agreements
- Landlord Information
- Lease Expiry Dates
- Rental Payments
- Renewal Alerts

Monitoring

- Lease Cost Analysis
- Expiry Notifications
- Renewal Planning

1.8. Legal & Contract Management

Handles all legal agreements and contracts.

Features

- Employment contracts
- Vendor contracts
- Renewal tracking
- Legal document repository
- Contract alerts

Why Important

- Prevents legal risks
- Ensures compliance readiness

1.9. Business Benefits

- Centralized management of all facilities and office operations.
- Improved workplace utilization and resource allocation.
- Faster resolution of facility-related issues.
- Reduced maintenance and operational costs.
- Enhanced employee productivity and workplace experience.
- Better monitoring of utility consumption and expenses.
- Improved workplace safety and compliance.
- Increased visibility into facility performance and operating costs.
- Data-driven planning for facility expansion and optimization.

The Facility & Office Management System provides complete visibility and control over organizational facilities, workplace resources, administrative services, and infrastructure operations, ensuring efficient facility utilization, cost optimization, regulatory compliance, and a productive work environment across all business locations.

2. Asset Management

The Asset Management module is a centralized platform designed to manage the complete lifecycle of organizational assets, from acquisition and registration to maintenance, tracking, utilization, and disposal. The system provides real-time visibility into asset ownership, location, condition, maintenance history, vendor information, and operational performance, enabling organizations to maximize asset utilization, reduce maintenance costs, and improve accountability.

The module supports all categories of assets, including machinery, vehicles, IT equipment, office equipment, tools, furniture, infrastructure assets, and operational equipment across multiple branches and locations.

2.1. Asset Registration & Master Data Management

The system maintains a comprehensive asset registry containing detailed information for every asset owned by the organization.

Asset Information

- Asset Code / Asset Number
- Asset Name
- Asset Category

- Asset Sub-Category
- Asset Type
- Serial Number
- Manufacturer Details
- Model Number
- Asset Description
- Purchase Date
- Warranty Period
- Useful Life
- Asset Value
- Depreciation Information
- Asset Status

Asset Classification

Assets can be categorized based on:

- Fixed Assets
- IT Assets
- Machinery & Equipment
- Vehicles
- Office Furniture
- Tools & Instruments
- Building & Infrastructure Assets
- Rental Assets
- Consumable Assets

2.2. QR Code & Barcode Asset Tracking

Each asset is automatically assigned a unique QR Code or Barcode for easy identification and tracking.

Features

- QR Code Generation
- Barcode Generation
- Asset Label Printing
- Mobile QR Code Scanning
- Instant Asset Information Retrieval
- Asset Verification Audits
- Physical Asset Tracking

Using QR scanning, users can instantly access asset details, service history, ownership records, maintenance schedules, and complaint history.

2.3. Asset Location & Position Tracking

The system maintains accurate records of asset locations and movements throughout the organization.

Location Tracking

- Branch Location
- Building
- Floor
- Department
- Room Number
- Warehouse Location

Asset Assignment

- Assets can be assigned to:
- Employees
- Departments
- Branches
- Vehicles
- Outlets

The system maintains a complete movement history whenever assets are transferred between locations or users.

2.4. Vendor & Supplier Management

The module maintains a centralized database of vendors and service providers associated with each asset.

Vendor Information

- Vendor Code
- Vendor Name
- Contact Person
- Address
- Telephone Numbers
- Email Address
- Service Agreements
- Annual Maintenance Contracts (AMC)
- Warranty Providers

2.5. Asset Maintenance Management

The system supports both preventive and corrective maintenance activities to ensure optimal asset performance.

Preventive Maintenance

- Maintenance Scheduling
- Service Calendars
- Automatic Maintenance Reminders
- Maintenance Checklists
- Planned Shutdown Management
- AMC Monitoring

Corrective Maintenance

- Breakdown Reporting
- Repair Requests
- Maintenance Work Orders
- Service Assignments
- Repair Cost Tracking
- Downtime Monitoring

2.6. Service History Management

A complete maintenance and service history is maintained for every asset throughout its lifecycle.

Service Records

- Service Date
- Service Type
- Service Provider
- Work Performed
- Parts Replaced
- Service Cost
- Downtime Duration
- Technician Information
- Next Service Due Date

This allows management to analyze asset reliability and maintenance costs over time.

2.7. Complaint & Issue Management

Users can report asset-related issues and service requests directly through the system.

Complaint Registration

- Complaint Number
- Complaint Date
- Asset Reference
- Complaint Category
- Priority Level
- Problem Description
- Supporting Documents or Images
- Complaint Workflow

Issue Reported -> Assigned to Maintenance Team -> Diagnosis -> Repair/Service -> Verification -> Closure

- Complaint Tracking
- Open Complaints
- In-Progress Complaints
- Escalated Complaints
- Closed Complaints
- Resolution Time Analysis

2.8. Asset Movement & Transfer Management

The system records all asset movements across the organization.

Transfer Types

- Employee Transfer
- Department Transfer
- Branch Transfer
- Outlet Transfer
- Temporary Assignment
- Asset Return

All transfers require authorization and generate a complete audit trail.

2.9. Warranty & AMC Management

The system monitors warranty and maintenance contract periods.

Features

- Warranty Expiry Tracking
- AMC Renewal Alerts
- Vendor Contract Monitoring
- Service Coverage Tracking
- Contract Cost Monitoring

Automated notifications help prevent missed warranty claims and contract expirations.

2.10. Asset Inspection & Audit Management

Supports periodic physical verification and compliance audits.

Audit Features

- Asset Verification Scheduling
- QR Code-Based Verification
- Missing Asset Identification
- Asset Condition Assessment

- Audit Findings Recording
- Audit Reports

2.11. Asset Depreciation Management

Integration with the Accounting Module enables automatic depreciation calculations.

Supported Methods

- Straight-Line Depreciation
- Reducing Balance Method
- Custom Depreciation Methods

The system automatically posts depreciation entries to the General Ledger.

2.12. Asset Disposal & Retirement Management

Manages the end-of-life process for organizational assets.

Disposal Types

- Sale
- Scrap
- Donation
- Write-Off
- Replacement

The system maintains complete disposal records and financial impact analysis.

2.13. Business Benefits

- Centralized control of all organizational assets.
- Real-time asset tracking through QR Code technology.
- Improved asset utilization and accountability.
- Reduced maintenance and replacement costs.
- Better warranty and contract management.
- Faster issue resolution through complaint tracking.
- Complete service and maintenance history.
- Improved compliance through asset audits.
- Accurate asset valuation and depreciation management.
- Enhanced decision-making through comprehensive reporting and analytics.

The Asset Management System provides complete lifecycle management of organizational assets, ensuring visibility, accountability, operational efficiency, and cost control across all branches, departments, and business operations.

3. Vehicle Management

The Vehicle Management Module is a comprehensive solution designed to manage and monitor the complete lifecycle of an organization's vehicle fleet. The system provides centralized control over vehicle registration, allocation, maintenance, fuel consumption, driver management, licensing, insurance, accidents, GPS tracking, operational costs, and regulatory compliance.

The module enables organizations to improve fleet utilization, reduce operational expenses, enhance vehicle safety, ensure compliance with regulatory requirements, and maintain complete visibility of fleet operations across multiple branches and locations.

3.1. Vehicle Master Registration

The system maintains a centralized vehicle registry containing complete information for every vehicle owned, leased, rented, or operated by the organization.

Vehicle Information

- Vehicle Registration Number
- Internal Fleet Number
- Vehicle Type
- Vehicle Category
- Make and Model
- Year of Manufacture
- Chassis Number
- Engine Number
- VIN Number
- Color
- Fuel Type
- Seating Capacity
- Load Capacity
- Purchase Date
- Purchase Cost
- Current Book Value
- Vehicle Status (Active, Under Maintenance, Sold, Retired)

Vehicle Classification

- Passenger Vehicles
- Commercial Vehicles
- Trucks and Trailers
- Construction Equipment

- Forklifts
- Delivery Vehicles
- Rental Vehicles
- Company-Owned Vehicles
- Leased Vehicles

3.2. Vehicle Allocation & Booking Management

The system manages vehicle assignments and usage requests.

- Vehicle Reservation Requests
- Vehicle Assignment Approval
- Department Vehicle Allocation
- Outlet Vehicle Allocation
- Driver Assignment
- Vehicle Return Management
- Usage History Tracking

3.3. GPS Tracking & Fleet Monitoring

Real-time vehicle tracking provides visibility into fleet operations.

GPS Features

- Live Vehicle Location
- Route Monitoring
- Trip Tracking
- Geofencing
- Idle Time Monitoring
- Speed Monitoring

Fleet Monitoring Dashboard

- Active Vehicles
- Vehicles in Transit
- Parked Vehicles
- Vehicle Utilization Status
- Driver Activity Monitoring

3.4. Vehicle Maintenance Management

The system supports preventive and corrective maintenance activities.

Preventive Maintenance

- Scheduled Service Management
- Mileage-Based Maintenance
- Time-Based Maintenance
- Service Reminders
- Maintenance Planning
- Annual Maintenance Contract Tracking

Corrective Maintenance

- Breakdown Reporting
- Repair Requests
- Workshop Management
- Work Order Generation
- Repair Cost Tracking
- Downtime Analysis

3.5. Vehicle Service History

A complete service and maintenance history is maintained for every vehicle.

Service Records

- Service Date
- Odometer Reading
- Service Type
- Service Provider
- Parts Replaced
- Labor Charges
- Total Service Cost
- Next Service Due Date

This enables management to evaluate vehicle performance and maintenance trends.

3.6. Fuel Management

The system monitors fuel consumption and operating efficiency.

Fuel Tracking

- Fuel Purchase Records
- Fuel Card Management
- Fuel Consumption Analysis
- Mileage Tracking
- Fuel Efficiency Calculation

- Fuel Cost Monitoring

Fuel Performance Reports

- Cost per Kilometer
- Vehicle Fuel Efficiency
- Driver Fuel Efficiency
- Fuel Consumption Trends
- Fuel Variance Analysis

3.7. Insurance Management

The system manages vehicle insurance policies and renewals.

Insurance Information

- Insurance Provider
- Policy Number
- Coverage Details
- Premium Amount
- Expiry Date
- Claim History

Automated Alerts

- Policy Expiry Notifications
- Renewal Reminders
- Claim Follow-up Alerts

3.8. Registration & Compliance Management

The system ensures regulatory compliance through automated tracking and alerts.

Compliance Monitoring

- Vehicle Registration Expiry
- Road Tax Expiry
- Fitness Certificate Expiry
- Inspection Due Dates
- Permit Expiry
- Environmental Compliance

Automated reminders prevent non-compliance and operational disruptions.

3.9. Accident & Incident Management

The module records and manages vehicle accidents and operational incidents.

Accident Records

- Accident Date and Time
- Vehicle Information
- Driver Information
- Accident Location
- Damage Assessment
- Insurance Claim Details
- Police Report Reference
- Repair Cost Analysis

Incident Tracking

- Accident Frequency
- Driver Risk Analysis
- Vehicle Risk Analysis
- Insurance Claim Monitoring

3.10. Tire & Spare Parts Management

Tracks vehicle components and replacement schedules.

Tire Management

- Tire Installation Records
- Tire Rotation Schedules
- Tire Replacement History
- Tire Cost Analysis
- Tire Performance Monitoring

Spare Parts Tracking

- Parts Inventory Integration
- Parts Consumption History
- Replacement Scheduling
- Cost Analysis

3.11. Vehicle Cost Management

Provides complete visibility into vehicle ownership and operating costs.

Cost Categories

- Purchase Cost
- Fuel Cost

- Maintenance Cost
- Insurance Cost
- Registration Cost
- Driver Cost
- Repair Cost
- Depreciation Cost

3.12. Vehicle Disposal & Replacement Management

Manages the end-of-life process of vehicles.

Disposal Methods

- Vehicle Sale
- Auction
- Trade-In
- Scrap Disposal
- Asset Write-Off

Replacement Planning

- Vehicle Lifecycle Analysis
- Replacement Recommendations
- Budget Forecasting

3.13. Business Benefits

- Centralized fleet management across all branches.
- Improved vehicle utilization and operational efficiency.
- Reduced fuel and maintenance costs.
- Enhanced driver accountability and safety.
- Better compliance with regulatory requirements.
- Automated maintenance scheduling and alerts.
- Real-time fleet visibility through tracking and reporting.
- Improved budgeting and cost control.
- Extended vehicle lifespan through proactive maintenance.
- Data-driven fleet planning and replacement decisions.

The Vehicle Management System provides complete visibility and control over the organization's fleet operations, ensuring efficient utilization, cost optimization, compliance management, and enhanced operational performance throughout the vehicle lifecycle.

4. Locker & Document Management

The Locker & Document Management module provides a secure, centralized platform for managing physical and digital documents, confidential records, legal files, contracts, certificates, licenses, and valuable assets stored within company lockers, cabinets, vaults, or document repositories.

The system enables organizations to maintain complete control over document storage, retrieval, movement, security, expiration monitoring, and audit tracking while ensuring compliance with regulatory and corporate governance requirements.

The solution serves as a centralized repository for critical business documents and valuable records across all departments, branches, and business locations.

4.1. Locker Management

The system maintains a complete register of all physical storage facilities used by the organization.

Locker Information

- Locker Code
- Locker Number
- Locker Type
- Branch Location
- Building
- Floor
- Room
- Cabinet Number
- Storage Capacity
- Security Level
- Locker Status

Locker Categories

- Fireproof Lockers
- Document Cabinets
- Safe Deposit Lockers
- Legal Record Storage
- Contract Storage
- HR Personnel File Storage
- Financial Record Storage
- Asset Ownership Document Storage

The system provides visibility into available, occupied, and reserved locker spaces.

4.2. Document Registration & Cataloging

All documents are registered and indexed for easy retrieval and tracking.

Document Information

- Document Number
- Document Title
- Document Category
- Document Type
- Document Owner
- Department
- Issue Date
- Expiry Date
- Reference Number
- Confidentiality Level
- Storage Location
- Remarks

Document Categories

- Company Registration Documents
- Trade Licenses
- Commercial Registrations
- Tax Documents
- Contracts & Agreements
- Legal Documents
- Insurance Policies
- Vehicle Documents
- Property Documents
- HR Employee Files
- Passport Copies
- Visa Documents
- Financial Records
- Bank Guarantees
- Tender Documents
- Compliance Certificates

4.3. Digital Document Repository

The system allows secure electronic storage of scanned documents and attachments.

Features

- Document Upload
- PDF Storage
- Image Storage
- Multiple File Attachments
- Version Control
- Document Preview
- Document Search
- Document Download Authorization

All documents are securely stored with controlled user access.

4.4. Document Movement & Tracking

The system records every movement of physical documents between departments or personnel.

- Movement Tracking
- Document Checkout
- Document Return
- Internal Transfer
- External Submission
- Temporary Issue
- Permanent Archive Transfer
- Tracking Information
- Issued To
- Issued By
- Issue Date
- Return Date
- Current Holder
- Approval History

This ensures complete accountability and traceability of all physical documents.

4.5. Expiry & Renewal Management

The system automatically monitors document validity and expiration dates.

- Expiry Tracking
- Trade License Expiry
- Commercial Registration Expiry
- Insurance Policy Expiry

- Vehicle Registration Expiry
- Contract's Expiry
- Bank Guarantee Expiry
- Visa Expiry
- Passport Expiry
- Certification Expiry
- Automated Alerts
- 90 Days Before Expiry
- 60 Days Before Expiry
- 30 Days Before Expiry
- Expired Document Alerts

Management receives notifications to initiate timely renewals.

4.6. Audit & Compliance Management

Provides complete visibility into document access and storage activities.

Audit Features

- Document Access Logs
- User Activity Tracking
- Movement History
- Expiry Monitoring
- Compliance Verification
- Audit Reports

All document-related activities are fully traceable and auditable.

4.7. Business Benefits

- Centralized management of physical and digital documents.
- Secure storage and controlled access to confidential records.
- Complete traceability of document movements and ownership.
- Automated expiry monitoring and renewal alerts.
- Improved regulatory and compliance management.
- Faster document retrieval through QR Code tracking.
- Reduced risk of document loss or misplacement.
- Enhanced audit readiness and transparency.
- Better utilization of physical storage facilities.
- Comprehensive reporting and document lifecycle management.

The Locker & Document Management System ensures secure, organized, and compliant management of all critical business documents while providing complete visibility, accountability, and control over document storage, access, movement, and retention across the organization.
