

AI-001 (VER 1.0)

VIGILO AI SURVEILLANCE ENGINE

 MINIMUM BD 3,000.000 BASE PACKAGE

Vigilo AI: Intelligent Computer Vision CCTV Surveillance, Automated Threat Detection & Forensic Video Analytics Specification Agreement

Converting standard CCTV & NVR feeds into real-time Computer Vision intelligence across Popular Auto Spare branches and Central Warehouse with 0 new camera hardware required, natural language forensic search, and multi-zone threat detection.

CLIENT ENTERPRISE

Popular Auto Spare &
A/C Parts Co.

VISION AI PRODUCT

Vigilo AI (by SaNDS Lab)

BASE COMMERCIALS

BD 3,000.000 (Base
Suite)

HARDWARE RETROFIT

0 New Cameras Needed

 **Executive Vision AI Mandate:** Popular Auto Spare & A/C Parts Co. W.L.L. operates multi-branch retail outlets and a central automotive spare parts warehouse housing high-value components (compressors, condensers, clutch systems, and electrical modules). Traditional CCTV systems provide passive, unmonitored video recording requiring hours of manual scrubbing after incidents occur. **Vigilo AI** (vigilo.sandslab.com) instantly converts existing IP cameras, DVRs, and NVRs into an active 24/7 AI Security Agent with sub-5-second threat alerts, natural language video interrogation, and proprietary 80% video storage compression.

1.0 Vigilo AI Core Platform Pillars & Zero-Hardware Integration

ZERO HARDWARE UPGRADE

LEGACY COMPATIBILITY

0 Hardware Cost

Directly ingests RTSP / ONVIF feeds from existing Hikvision, Dahua, CP Plus, or any standard IP cameras/NVRs without camera replacement.

ALERT VELOCITY

< 5 Seconds

Ultra-low latency inference engine dispatches instant high-priority alerts to management via Mobile App, WhatsApp, SMS, and Portal.

STORAGE EFFICIENCY

80% Storage Saver

Proprietary "Switching Technology" converts continuous streams into high-fidelity frame metadata, reducing NVR storage bloat by up to 80%.

FORENSIC QUERY

Talk to CCTV

Natural language video search allows managers to query: "Find person in blue shirt near AC compressor rack after 7 PM" in seconds.

JOURNEY MAPPING

Visual Identity

Upload a photo of a visitor or staff member to reconstruct their exact movement timeline, camera IDs, and duration across all branches.

INCIDENT DETECTION

6,000+ Classes

Trained neural networks identify perimeter breaches, counter crowding, unauthorized rack access, fights, and safety non-compliance.

The minimum base deployment of **BD 3,000.000** equips Popular Auto Spare with a ready-to-deploy suite of battle-tested Computer Vision models specifically customized for automotive spare parts warehousing and multi-branch retail stores:

INBUILT MODEL MODULE	DEPLOYMENT TARGET	FUNCTIONAL INTELLIGENCE & OPERATIONAL IMPACT
 Perimeter & After-Hours Intrusion	WAREHOUSE & BRANCHES	Virtual tripwires and customizable polygon bounding zones. Detects humans, vehicles, and unauthorized intrusions outside operating hours with zero false positives from shadows or insects.
 POS Counter & Cash Desk Shield	BRANCH RETAIL COUNTERS	Monitors counter queue depth, cashier dwell time, cash drawer opening duration, and customer-cashier exchange integrity to prevent un-invoiced stock transfers.
 "Talk-to-CCTV" Natural Language Search	ENTERPRISE VIDEO ARCHIVE	Multi-modal semantic search engine. Enables executives to search surveillance footage using everyday English phrases (e.g. <i>"Show delivery vans arriving between 14:00 and 16:00"</i>).
 Visual Identity Journey & Re-ID	MULTI-CAMERA NETWORK	Cross-camera re-identification. Tracks specific individuals or vehicles across multiple camera feeds, compiling a consolidated timestamped visual trail with entry/exit timestamps.
 High-Value Rack & Zone Protection	A/C COMPRESSOR & ECU RACKS	Monitors high-value automotive inventory zones (Compressors, Clutches, Radiators, ECUs). Triggers real-time alerts if personnel access restricted bins without authorized supervisor badges.
 Warehouse Hazard & Blocked Aisle Guard	CENTRAL LOGISTICS FLOOR	Detects safety violations, blocked fire exits, pallet obstructions in forklift pathways, and personnel entering hazardous overhead storage zones.

 **Turnkey Base Package Deliverable:** The **BD 3,000.000** base investment includes Vigilo AI Gateway provisioning, integration with up to 16 existing camera streams, configuration of all 6 inbuilt models above, and manager portal training.

Where Popular Auto Spare requires bespoke automotive Computer Vision models tailored to proprietary business workflows, SaNDS Lab provides dedicated model training, dataset annotation, and neural fine-tuning as modular add-ons:

Custom Model: Automotive Part OCR & Barcode

Automated high-speed camera scanning of manufacturer part numbers (Denso, Valeo, Sanden, Bosch) directly on moving packaging boxes at goods-inward verification.

Pricing Basis: Based on dataset size, lighting variations & OCR library training (Quoted separately per specification).

Custom Model: Automated ANPR & Fleet Tracking

Automatic Bahrain License Plate Recognition (ANPR) for company delivery vans and vendor supply trucks at warehouse loading bays synced with ERP Goods Receipt (GRN) timestamps.

Pricing Basis: Based on camera angle, number of loading bay lanes & vehicle classifier depth.

CUSTOM MODEL TIER	DEVELOPMENT LIFECYCLE	ENGINEERING DELIVERABLES & SCOPE
Tier 1: Minor Custom Classifier	10 – 15 Working Days	Custom object bounding box training (e.g. specialized uniform recognition, specific pallet condition grading).
Tier 2: Deep OCR & Inspection Model	20 – 30 Working Days	High-accuracy optical character recognition on automotive parts, serial engraving validation, and surface scratch detection.
Tier 3: Complex Multi-Stream Behavior AI	30 – 45 Working Days	Multi-camera synchronized behavioral tracking (e.g. employee productivity heatmaps, forklift near-miss trajectory analysis).

Custom Model Pricing Governance: Separate custom models are scoped individually based on dataset annotation requirements, synthetic data generation, GPU compute hours, and target accuracy thresholds (>95% precision). Detailed statements of work will be provided prior to model initiation.

Vigilo AI Enterprise CCTV Conversion Package

Includes Vigilo AI Edge Gateway deployment, integration with existing cameras/NVRs, 6 inbuilt core Computer Vision models, "Talk to CCTV" natural language engine, and multi-branch management dashboard.

BD

3,000.000

MINIMUM BASE PACKAGE

DELIVERABLE / DEPLOYMENT SCOPE	SCOPE COVERAGE	COMMERCIAL VALUE (BHD)
Vigilo AI Enterprise Base Suite & Gateway Engine RTSP/ONVIF Stream Ingestion • Zero-Hardware CCTV Retrofit • 80% Storage Compression	Up to 16 Camera Feeds	Included in Base
6 Inbuilt Production Vision AI Models Suite Perimeter Shield • POS Cash Counter • Talk to CCTV • Visual Re-ID • High-Value Rack • Aisle Hazard	Full 6-Model Suite	Included in Base
Multi-Channel Real-Time Alerting Engine & Portal Dashboard WhatsApp, SMS, Mobile Push & Executive Incident Digest • 24/7 Threat Logging	Multi-Branch Portal	Included in Base
Custom Domain AI Models (Optional Add-ons) Part Number OCR, ANPR, Defect Inspection, Forklift Safety AI	Per Custom Model	Variable (Per Spec)
MINIMUM BASE PACKAGE INVESTMENT (INBUILT MODELS):		BD 3,000.000

5.0 Executive Multi-Party Digital Acceptance Console

CRYPTOGRAPHIC SIGN-OFF

By digitally signing below, all three authorized executive parties formally approve and execute the Vigilo AI CCTV surveillance platform specifications, the 6 inbuilt Computer Vision models, and the minimum base investment commitment of **BD 3,000.000**.
